

XML data format for reporting ABP MOC learner data to PARS

This document defines the elements to be used by providers when reporting learner completion data to ACCME's Program and Activity Reporting System (PARS) for the American Board of Pediatrics (ABP) Maintenance of Certification (MOC) program. The XML schema is based on version 1.0 of the **Medbiquitous ActivityReports** standard.

Some key points:

1. Learner data is being collected in PARS for CME activities which have been registered for Maintenance of Certification (MOC) with the American Board of Pediatrics (ABP). All learner records must reference a valid ABP diplomate ID. Learner completion data that is not associated with an activity registered for ABP MOC or lacks a valid ABP diplomate ID will result in file validation errors.
2. This description includes only the data elements that are required to submit learner data to PARS. For complete documentation on all data elements that are supported by the Medbiquitous standard, please refer to the Medbiquitous website http://www.medbiq.org/std_specs/standards/index.html. Note that the ActivityReport standard incorporates by reference portions of the Healthcare Professional Profile and Healthcare Learning Objects Metadata (LOM) standards.
3. ACCME has extended the Medbiquitous schema by adding a custom root container (ACCMELearnerReports) and a subelement in the ActivityReport XtensibleInfo element to store metadata related to record transaction operations.
4. PARS will expect an ActivityReport element container for each participant completion record in the file. Each ActivityReport container will include one completion record for one learner.

Learner Completion Data Elements

Element Name	Description	Min Occurs	Max Occurs	Type	ACCME Business Rules
ACCMELearnerReports	Super root element container for ActivityReports	1	1	Complex	ACCMELearnerReports is the container for all participant completion records.
ActivityReports	Medbiquitous-defined container element. Contains one or more individual ActivityReport elements.	1	1	Complex	
DateTimeCreated	The date and time the current LearnerReports file was created.	1	1	Date/Time	Use format yyyy-mm-ddThh:mm:ss (Example: 2016-07-30T17:00:00)

XML data format for reporting ABP MOC learner data to PARS

Element Name	Description	Min Occurs	Max Occurs	Type	ACCME Business Rules
